Allwins Kannan Rajaiah

Allwins Rajaiah

Solutions Architect | Director of Technology | AI | Cloud | Data | Full Stack

linkedin.com/in/allwinsrajaiah/

PROFESSIONAL SUMMARY

- Director of Technology and Solutions Architect with 22+ years of experience leading technology strategy, enterprise architecture, engineering, and delivery across Cloud, AI/GenAI, Data, Microservices, and Full-Stack platforms.
- Architect end-to-end enterprise and cloud solutions, translating business requirements into scalable, secure, resilient, and cost-effective architectures across AWS and GCP.
- Lead AI and data modernization initiatives spanning Generative AI, Agentic AI, AgentCore Runtime, Amazon Bedrock, RAG, MCP, AI Governance, Data Engineering, Databricks, PySpark, and dbt.
- Hands-on engineering leader with strong expertise in Java, Spring Boot, Angular, Kubernetes, Docker, Terraform, and CI/CD, with a focus on cloud-native application delivery.
- Drive architecture governance, engineering excellence, Agile delivery, and cross-functional technical leadership, partnering with business and technology stakeholders to deliver enterprise-scale solutions.

CORE TECHNOLOGY

Architecture and technology leadership: Solution and Cloud Architecture, Technology Strategy, Architecture Governance, Enterprise Modernization, Microservices, Distributed Systems, Event-Driven Architecture, API Design.

AI and GenAI: AIDLC, Generative AI, Agentic AI, AgentCore Runtime, Bedrock, RAG, MCP, LLM Applications, Knowledge Bases, AI Guardrails, AI Governance, AI Evaluation, Langfuse.

Cloud and platform: AWS, GCP, Kubernetes, Docker, Terraform, Serverless, Cloud Security, Scalability, Reliability and Cost Optimization.

Data architecture: Data Architecture, Data Pipelines, Data Modeling, Spark, Databricks, Data Quality, Data Governance.

DevOps: CI/CD, GitHub Actions, Jenkins, Automated Testing, Release Engineering.

Full stack and application: Java, Spring Boot, Hibernate, Angular, React, Node.js, REST APIs, JavaScript, HTML, OAuth, SAML, JWT.

Databases and search: Oracle, PostgreSQL, MySQL, DB2, MongoDB, DynamoDB, Elasticsearch.

Mobile and emerging tech: Flutter, Android, iOS, Replit, Cursor, GitHub Copilot.

PROFESSIONAL EXPERIENCE

Director of Technology | Data and Application Engineering & Solution Architecture

Tekizma Inc. · Sep 2024 – Present

- Define technology strategy, solution architecture, and technical roadmaps for enterprise data, cloud, and AI platforms, aligning architecture decisions with business outcomes and engineering priorities.
- Lead architecture and solution design across data platforms, cloud services, microservices, APIs, and AI/ML capabilities, ensuring scalable, secure, maintainable, and resilient solutions.
- Establish architecture governance, engineering standards, and design patterns covering scalability, security, data quality, observability, maintainability, and operational resilience.
- Architect Azure Databricks data platforms covering data ingestion, transformation, modeling, orchestration, validation, and reusable data products for analytics and downstream applications.
- Design and optimize data engineering pipelines using PySpark, SQL, dbt, and Databricks, with emphasis on data quality, performance, reliability, and reusable data assets.

- Design reconciliation architecture and data flows, defining source-to-target mappings, validation rules, data quality controls, exception handling, and scalable processing patterns.
- Design cloud architectures in AWS, covering compute, storage, networking, security, monitoring, availability, scalability, and cost optimization.
- Lead legacy application modernization and cloud migration, migrating a Spring/JSP-based enterprise application to a modern Spring Boot, Angular, REST API, Hibernate, and MySQL architecture on AWS.
- Drive decomposition of legacy application components into modern application and API layers, improving scalability, maintainability, deployment automation, and integration capabilities.
- Integrate AI/ML capabilities with enterprise data platforms for intelligent data processing, natural-language data interaction, automated documentation, and AI-assisted engineering workflows.
- Lead architecture reviews, technical decisions, dependency and risk management, and stakeholder communication from requirements and solution design through implementation and production release.
- Provide technical leadership and mentoring across data engineering, application development, QA, and cross-functional engineering teams, driving engineering excellence and Agile delivery.

Key achievement

- Enhanced reconciliation accuracy by 50% through the design and deployment of automated validation and exception-handling frameworks.
- Reduced development effort by 40% through reusable dbt/Databricks frameworks and AI-assisted engineering.

Technologies: Databricks, PySpark, dbt, SQL, AWS, Spring Boot, Angular, REST APIs, Hibernate, MySQL, Microservices, AI/ML, Data Engineering.

Solutions Architect / Application Designer

Advanced Software Design, Inc. · Sep 2013 – Aug 2024

- Architected scalable multi-tier enterprise applications using Spring Boot, Angular, microservices, REST APIs, and AWS, applying cloud-native and distributed application patterns.
- Designed application and integration architectures for complex enterprise workflows, defining service boundaries, API contracts, integration patterns, and technology components.
- Designed secure, resilient, and high-performance REST APIs and microservices, addressing authentication, authorization, scalability, maintainability, and operational readiness.
- Designed AWS-based application solutions covering compute, storage, databases, security, deployment, and availability, aligning cloud services with application requirements.
- Led application modernization initiatives, evaluating legacy application components and defining target-state architectures and incremental modernization strategies.
- Established application design patterns and reusable technical components to improve consistency, maintainability, scalability, and development efficiency across enterprise applications.
- Translated complex business requirements into technical designs, architecture specifications, integration solutions, and implementation roadmaps.
- Collaborated with development, QA, business analysis, and delivery teams to resolve complex technical issues, architectural dependencies, and integration challenges throughout the application lifecycle.
- Contributed to technical estimation, solution planning, release readiness, and production issue resolution, ensuring successful delivery of enterprise applications.

Key achievement

- Orchestrated the official Health Plan Marketplace for New York State of Health, processing 5 million enrollments for 2020.

Technologies: Spring Boot, Angular, REST APIs, Microservices, AWS, Hibernate, Oracle, DB2, DynamoDB, Docker, Kubernetes, Jenkins, Git.

Technical Manager | Solutions Architecture & Mobile Platforms

Marlabs Software Pvt. Ltd., Piscataway, NJ · Sep 2010 – Sep 2013

- Defined cross-platform mobile solution architecture for iOS, Android, and PhoneGap applications, covering security, authentication, REST APIs, logging, and platform standards.

- Translated business and technical requirements into mobile solution architecture, application designs, wireframes, SDLC plans, and delivery roadmaps for client and internal products.
- Architected eFleetPro enterprise integration solutions connecting construction-equipment manufacturers, dealers, and rental fleets with ERP systems, punch-out integrations, and payment gateways.
- Designed mobile-to-enterprise integration patterns for secure communication between mobile applications, backend services, ERP platforms, and external systems.
- Led the Mobile Center of Excellence, defining reusable architecture patterns, platform standards, and technical practices for cross-platform application development.
- Managed solution design, development planning, team formation, hiring, and delivery across client and internal mobile initiatives.
- Presented cross-platform architecture capabilities and technology solutions to customers and leadership, supporting solution positioning, client engagement, and revenue growth.

Technologies: iOS, Android, PhoneGap, REST APIs, Java, Mobile Architecture, Enterprise Integration, ERP Integration, Payment Gateway Integration, Security and Authentication.

ADDITIONAL EXPERIENCE

The source résumé lists title, employer, and dates for these roles.

J2EE Tech Lead, MapView Geographical Solutions (P) Ltd, Sep 2009 – Aug 2010.

J2EE Tech Lead, Star4ce Technologies Inc, Nov 2007 – Sep 2009.

Senior Programmer Analyst, Amtex Systems, Apr 2007 – Sep 2007.

Senior Software Engineer, 3i Infotech, Apr 2004 – Jan 2007.

Software engineer, Asic Infotech Pvt Ltd, May 2003 – Feb 2004.

EDUCATION

B.E., Computer Science & Engineering, Amrita Institute, Bharathiar University, India.

CERTIFICATION

AWS Certified AI Practitioner (AIF-C01). Issued September 2026. Credential ID cd4be8c7c3ea48aca09bc7a181355061. Verification: https://www.credly.com/earner/earned/badge/496bc744-8636-4032-9eb0-975867c4f0d5. The source résumé names the certification and exam code. The credential ID, verification link, and issue month are the public LinkedIn and Credly values.
