Allwins Kannan Rajaiah

Director of Technology | Engineering Leadership & Solutions Architecture

Full-Stack & Cloud-Native Platforms · AI / GenAI · Data Platforms · Development & QA Team Leadership

linkedin.com/in/allwinsrajaiah/

PROFESSIONAL SUMMARY

- Director of Technology with 20+ years of experience leading engineering, architecture, and delivery of full-stack, cloud-native, data, and AI platforms.
- Engineering leadership: own team structure, delivery planning, quality strategy, hiring, and mentoring, driving Agile execution and release quality from requirements through production.
- Hands-on architect in Java, Spring Boot, Angular, React, microservices and AWS, translating business goals into scalable, secure, and cost-effective solutions.
- AI and data modernization with Generative AI, Agentic AI, Amazon Bedrock, AgentCore Runtime, RAG, and MCP, and Databricks, PySpark, and dbt data platforms.
- Architecture governance and engineering excellence: standards, design reviews, CI/CD, and observability partnering with business and technology stakeholders.

CORE TECHNOLOGY

Leadership & Architecture: Engineering Leadership, Multi-Team Management (Dev & QA), Technology Strategy, Architecture Governance, Agile Delivery, Hiring & Mentoring, Stakeholder Management, Enterprise Modernization.

Full Stack & Application: Java, Spring Boot, Hibernate, Angular, React, Node.js, REST APIs, JavaScript, HTML, OAuth, SAML, JWT.

Distributed Systems & Messaging: Microservices, Event-Driven Architecture, Apache Kafka, Redis (Caching, Pub/Sub), API Design, Integration Patterns.

Cloud & Platform: AWS (EC2, ECS, Fargate, Lambda, VPC, ALB/NLB, S3, CloudFront, IAM, KMS, Cognito, WAF), Kubernetes, Docker, Terraform, CloudFormation, Serverless, Cloud Security & Cost Optimization, GCP (working knowledge).

AI & GenAI: Generative AI, Agentic AI, Amazon Bedrock, AgentCore Runtime, RAG, MCP, LLM Applications, Knowledge Bases, AI Guardrails, AI Governance, AI Evaluation, Langfuse.

Data Engineering: Databricks (on Azure), Spark, PySpark, dbt, SQL, Data Pipelines, Data Modeling, Data Quality, Data Governance.

DevOps & Observability: CI/CD, AWS CodePipeline, GitHub Actions, Jenkins, CloudWatch, Prometheus, Automated Testing, Release Engineering.

Databases & Search: Oracle, PostgreSQL, MySQL, DB2, MongoDB, DynamoDB, Elasticsearch.

Mobile: Flutter, Android, iOS.

AI-Assisted Development: Claude Code, GitHub Copilot, Cursor, Replit.

PROFESSIONAL EXPERIENCE

Director of Technology

Tekizma Inc. · Sep 2024 – Present

- Lead engineering teams across application, data, and AI workstreams, owning team structure, sprint planning, hiring, mentoring, and delivery from requirements through production release.
- Define technology strategy, solution architecture, and technical roadmaps for enterprise application, data, cloud, and AI platforms, aligning architecture decisions with business outcomes.

- Led the modernization and AWS migration of a Spring/JSP enterprise application to Spring Boot, Angular, REST APIs, Hibernate, and MySQL, decomposing legacy components into modern application and API layers with automated deployments.
- Direct the QA function, aligning test strategy, release readiness, and defect management with the development teams' Agile delivery.
- Architect Databricks data platforms on Azure with PySpark, SQL, and dbt, covering ingestion, transformation, modeling, orchestration, and reusable data products for analytics and ML workloads.
- Design reconciliation (Recon) architecture, defining source-to-target mappings, validation rules, data quality controls, and exception handling.
- Integrate Generative AI capabilities with enterprise data platforms for natural-language data interaction, automated documentation, and AI-assisted engineering workflows.
- Establish architecture governance and engineering standards, including design reviews, security, observability, risk and dependency management, and stakeholder communication.

Key achievements

- Enhanced reconciliation accuracy by 50% through the design and deployment of automated validation and exception-handling frameworks.
- Reduced development effort by 40% through reusable dbt/Databricks frameworks and AI-assisted engineering.

Technologies: Databricks (Azure), PySpark, dbt, SQL, AWS, Spring Boot, Angular, REST APIs, Hibernate, MySQL, Microservices, Generative AI, Data Engineering.

Solutions Architect

Advanced Software Design, Inc. · Sep 2013 – Aug 2024

- Architected multi-tier enterprise applications using Spring Boot, Angular, microservices, REST APIs, and AWS, applying cloud-native and distributed design patterns.
- Defined service boundaries, API contracts, and integration patterns for complex enterprise workflows, translating business requirements into architecture specifications and roadmaps.
- Designed secure, high-performance REST APIs and microservices, addressing authentication, authorization, and operational readiness.
- Led application modernization, evaluating legacy components and defining target-state architectures and incremental migration strategies.
- Established reusable design patterns and technical components, improving consistency and development efficiency across enterprise applications.
- Partnered with development, QA, business analysis, and delivery teams on estimation, release readiness, and resolution of complex production and integration issues.

Key achievement

- Delivered the official Health Plan Marketplace for New York State of Health, supporting 5 million enrollments in 2020.

Technologies: Spring Boot, Angular, REST APIs, Microservices, AWS, Hibernate, Oracle, DB2, DynamoDB, Docker, Kubernetes, Jenkins, Git.

Technical Manager | Solutions Architecture & Mobile Platforms

Marlabs Software Pvt. Ltd., Piscataway, NJ · Sep 2010 – Sep 2013

- Defined cross-platform mobile solution architecture for iOS, Android, and PhoneGap applications, covering security, authentication, REST APIs, logging, and platform standards.
- Translated business and technical requirements into mobile solution architecture, application designs, wireframes, SDLC plans, and delivery roadmaps for client and internal products.
- Architected eFleetPro enterprise integration solutions connecting construction-equipment manufacturers, dealers, and rental fleets with ERP systems, punch-out integrations, and payment gateways.
- Designed mobile-to-enterprise integration patterns for secure communication between mobile applications, backend services, ERP platforms, and external systems.

- Led the Mobile Center of Excellence, defining reusable architecture patterns, platform standards, and technical practices for cross-platform application development.
- Managed solution design, development planning, team formation, hiring, and delivery across client and internal mobile initiatives.
- Presented cross-platform architecture capabilities and technology solutions to customers and leadership, supporting solution positioning, client engagement, and revenue growth.

Technologies: iOS, Android, PhoneGap, REST APIs, Java, Mobile Architecture, Enterprise Integration, ERP Integration, Payment Gateway Integration, Security & Authentication.

ADDITIONAL EXPERIENCE

Tech Lead, Mapview Geographical Solutions, Sep 2009 – Aug 2010.

Tech Lead / Senior J2EE, Star4ce Technologies, Inc., Nov 2007 – Jun 2009.

Team Lead, Amtex Systems, Inc., Apr 2007 – Oct 2007.

Team Lead, 3i-Infotech, Apr 2004 – Feb 2007.

Java Developer, Asic Infotech Pvt. Ltd., May 2003 – Feb 2004.

EDUCATION

B.E., Computer Science & Engineering, Amrita Institute, Bharathiar University, India.

CERTIFICATION

AWS Certified AI Practitioner (AIF-C01). Issued September 2026. Credential ID cd4be8c7c3ea48aca09bc7a181355061. Verification: https://www.credly.com/earner/earned/badge/496bc744-8636-4032-9eb0-975867c4f0d5.
