20+ Years of Experience | Agentic AI on AWS | AI-Driven Modernization | Technical Leadership & Delivery

ALLWINS RAJAIAH

PROFESSIONAL SUMMARY

- **AI Solutions Architect with 20+ years of experience** in delivering enterprise applications, cloud-native platforms, and AI-enabled solutions, translating business challenges into scalable, secure, and production-ready architectures.
- **Design end-to-end AI and cloud architectures on AWS,** integrating Generative AI, Agentic AI, Java, Spring Boot, Angular, React, microservices, and REST APIs.
- **Build agentic AI solutions** using Amazon Bedrock AgentCore, Strands Agents, MCP, RAG, and human-in-the-loop controls, with secure tool integration, observability, and evaluation.
- **Lead cloud-native application architecture and AI-enabled data engineering** with Databricks, Auto Loader, Lakeflow, PySpark, SQL, dbt, and Unity Catalog, delivering governed data products and automated reconciliation.
- **Drive technology strategy and engineering excellence** through governance, design reviews, roadmaps, security standards, and cross-functional leadership of development and QA teams.

CORE TECHNOLOGY

Architecture & Leadership	Solution Architecture, Cloud Architecture, Architecture Governance, Design Reviews, Enterprise Modernization, Team Leadership, Estimation & Release Readiness
AI & GenAI	Generative AI, Agentic AI, Amazon Bedrock, AgentCore, Strands Agents, MCP, RAG, Bedrock Knowledge Bases, LLM Applications, AI Governance, AI Evaluation, Langfuse
Cloud & Platform	AWS, Docker, Kubernetes, Terraform, Serverless, Cloud Security, Scalability & Cost Optimization
Data Engineering	Databricks, Lakeflow, Auto Loader, Databricks Workflows, Unity Catalog, PySpark, dbt, SQL, Data Pipelines
Application & Integration	Java, Spring Boot, Hibernate, Angular, Microservices, REST APIs, Redis, OAuth, JWT, Node.js, HTML, CSS, JavaScript, TypeScript
DevOps & Observability	CI/CD, Git, Jenkins, AWS CodePipeline, Prometheus, Splunk, Datadog, OpenTelemetry
Databases	Oracle, MySQL, DB2, Amazon RDS
AI-Assisted Development	Claude Code, GitHub Copilot, Replit, Cursor

CAREER TIMELINE & EXPERIENCE

May 2003 – Feb 2004 — Asic Infotech Pvt. Ltd.
Java Developer
- HR & accounts modules
- Database reports

Apr 2004 – Feb 2007 — 3i-Infotech
Team Lead
- Internet banking
- Compliance toolkit

Apr 2007 – Oct 2007 — Amtex Systems, Inc.
Team Lead
- Multi-database connectivity
- Web interfaces

Nov 2007 – Jun 2009 — Star4ce Technologies, Inc.
Tech Lead / Senior J2EE
- Web workflow solution
- SOAP integrations

Sep 2009 – Aug 2010 — Mapview Geographical Solutions
Tech Lead
- Geographic solutions
- Payment gateway

Sep 2010 – Sep 2013 — Marlabs Software
Technical Manager | Mobile Solutions Architecture
- Mobile Centre of Excellence
- eFleetPro integration
- Team formation & hiring

Sep 2013 – Aug 2024 — Advanced Software Design
Solutions Architect
- Enterprise applications on AWS
- Application modernization
- NY State Health Plan Marketplace

Sep 2024 – Present — Tekizma
Director of Technology | AI Solutions Architect
- Application modernization
- Agentic AI, MCP & RAG
- Databricks & reconciliation

KEY ACHIEVEMENTS & IMPACT

50%
Improved reconciliation accuracy

5M
Enrollments supported in 2020, NY State of Health

AI-Driven Delivery
AIDLC practices with human review and quality gates

Cross-functional Leadership
Architecture governance across development and QA teams

EDUCATION

B.E., Computer Science & Engineering
Bharathiar University, India

CERTIFICATION

- **AWS Certified AI Practitioner** AIF-C01
- **HashiCorp Certified: Terraform Associate** 004

RECENT EXPERIENCE HIGHLIGHTS

Tekizma | Director of Technology | AI Solutions Architect — **Sep 2024 – Present**

Enterprise Application Modernization

- Defined solution architecture, target-state roadmaps, and design standards for application, data, cloud, and AI platforms.
- Led the modernization of a legacy Spring/JSP application into a cloud-native platform on AWS.
- Developed AI-powered capabilities with Agentic AI and Amazon Bedrock AgentCore.
- Designed secure AI agent integration using the Model Context Protocol (MCP), with RAG over an enterprise knowledge base.
- Established AI-Driven Development Life Cycle (AIDLC) practices with human review and quality gates.

Databricks Data Engineering & Reconciliation

- Built a Databricks platform with Auto Loader, Lakeflow, PySpark, SQL, dbt, and Databricks Workflows.
- Established data governance and reusable data products with Unity Catalog.
- Designed the end-to-end reconciliation architecture: mappings, validation rules, and exception handling.
- Developed an AI reconciliation agent that recommends corrective actions for analyst approval, traced with Langfuse.
